Profile

Computer Science undergraduate at United International University with a focus on Artificial Intelligence, Natural Language Processing, low-resource language processing, and software engineering. Currently researching coordinated propaganda detection in low-resource Bangla, with interests in dataset construction, preprocessing, and evaluation. Experienced in developing full-stack, AI-assisted, and embedded/IoT systems.

Education

United International University (UIU), Bangladesh	Jan 2023 – Present
Bachelor of Science in Computer Science and Engineering	Final Year
Kushtia Government College, Kushtia	Jun 2018 – Jun 2020
Higher Secondary Certificate (HSC), Science	GPA: 5.00

Research

Coordinated Propaganda Detection in Low-Resource Bangla	In Progress
- Investigating coordinated propaganda detection in Bangla, a low-resource language, using data collected from online media. - Exploring the construction of a Bangla propaganda dataset and studying existing datasets, preprocessing techniques, and evaluation methodologies. - Reviewing research literature to identify suitable approaches for low-resource NLP and propaganda detection.	

Selected Projects

HelioSense	In Progress
Real-time smart solar panel monitoring system for monitoring panel and environmental parameters. Tech: ESP32, C++, Sensors, IoT	
MediSheba BD	Completed
Smart healthcare and live queue management system with real-time queue tracking for patients and doctors. Tech: React, TypeScript, Node.js, MySQL	
KaajerBazar	Completed
Micro-project marketplace for Bangladeshi students with AI-assisted bid matching. Tech: Next.js, Tailwind CSS, Supabase, Claude API	
Local Flood Management System	Completed
Environmental monitoring and early flood-warning prototype using sensor-based real-time data collection. Tech: ESP32, C++, Sensors, IoT	
JavaFX Resume Generator	Completed
Desktop resume builder demonstrating object-oriented software design and JavaFX development. Tech: Java, JavaFX, OOP	

Technical Skills

Languages: Python, C, C++, Java, JavaScript, TypeScript
AI/ML & NLP: PyTorch, TensorFlow, Hugging Face, NLP, Low-Resource NLP
Web & Backend: React, Next.js, Node.js, FastAPI, Tailwind CSS
Databases: MySQL, PostgreSQL, Supabase
Embedded & IoT: ESP32, Raspberry Pi, Sensors
Tools: Git, GitHub

Areas of Interest

Artificial Intelligence, Machine Learning, Natural Language Processing, Low-Resource Language Processing, Propaganda Detection, Dataset Construction, Embedded Systems, and Applied AI Research.
